113

1 A multicenter study of the safety and effectiveness of mechanical thrombectomy for patients with acute ischemic stroke not meeting top-tier evidence criteria

17 Intravenous thrombolysis before endovascular therapy for large vessel strokes can lead to significantly higher hospital costs without improving outcomes

22 Timing of vessel imaging for suspected large vessel occlusions does not affect groin puncture time in transfer patients with stroke

25 Elevated mean platelet volume is associated with poor outcome after mechanical thrombectomy

29 Intra-arterial nitroglcerin as directed acute treatment in experimental ischemic stroke

34 Clot friction variation with fibrin content; implications for resistance to thrombectomy

39 Relay-balloon technique for recanalization of acute symptomatic proximal internal carotid artery occlusion with short balloon-tipped guiding catheter landing zone

44 A survey of intracranial aneurysm treatment practices among United States physicians

50 Optimal first coil selection to avoid aneurysmal recanalization in endovascular intracranial aneurysmal coiling

55 Posterior circulation perforator aneurysms: a proposed management algorithm

60 Autologous adipose-derived mesenchymal stem cells improve healing of coiled experimental saccular aneurysms: an angiographic and histopathological study

JNIS January 2018
