### Contents

**Commentary**

i1  Future directions in IAT: better studies, better selection, better timing and better techniques  
A J Yoo, T M Leslie-Mazwi, T G Jovin

**Review**

i7  The Massachusetts General Hospital acute stroke imaging algorithm: an experience and evidence based approach  

**Patient selection**

i13  Imaging-based selection for intra-arterial stroke therapies  
L T Moraí, T M Leslie-Mazwi, M H Lev, C W Allers, A J Yoo

i21  Importance of proper patient selection and endpoint selection in evaluation of new therapies in acute stroke: further analysis of the SENTIS trial  
A Shraba, S Schwab, J N Rutledge, S Starkman, D S Liebeskind, G L Bernardini, A Bolesl, A Alou-Chébl, D Y Huang, G Vanhooren, S Cruz-Flores, R P Kluznick, J L Saver, for the SENTIS trial investigators

i25  Pre-intervention cerebral blood volume predicts outcomes in patients undergoing endovascular therapy for acute ischemic stroke  
A T Rai, K Raghuram, J S Carpenter, J Domíco, G Hobbs

i33  Multimodal endovascular management of acute ischemic stroke in patients over 75 years old is safe and effective  

i38  A novel clinical and imaging based score for predicting outcome prior to endovascular treatment of acute ischemic stroke  
K M Fargen, J Chaudry, R D Turner, J A Bennett, A Turk, J Mocco

i44  Implementation of a patient selection protocol for intra-arterial therapy increases treatment rates in patients with acute ischemic stroke  
N S Rost, E E Smith, R G Nogueira, K M Fitzpatrick, A J Yoo, J A Hirsch, L H Schwamm

### Time to treatment

i48  Interaction between time to treatment and reperfusion therapy in patients with acute ischemic stroke  
M G Lansberg, G Dabus

i52  Assessing variability in neurointerventional practice patterns for acute ischemic stroke  

i58  Ultrashort imaging to reperfusion time interval arrests core expansion in endovascular therapy for acute ischemic stroke  
M A Almekhlafi, M Eesa, B K Menon, A M Demchuk, M Goyal

i62  Advanced modality imaging evaluation in acute ischemic stroke may lead to delayed endovascular reperfusion therapy without improvement in clinical outcomes  

### Procedural techniques

i66  Intra-arterial reperfusion strategies in acute ischemic stroke  
A P JadHAV, T G Jovin

i70  Difficult catheter access to the occluded vessel during endovascular treatment of acute ischemic stroke is associated with worse clinical outcome  
M Ribo, A Flores, M Rubnera, J Pagola, N Mendonca, D Rodriguez-Luna, S Pitieiro, P Meler, J Alvarez-Sabin, C A Molina

i74  The SPEED study: initial clinical evaluation of the Penumbra novel 054 Reperfusion Catheter

i77  Initial experience of a novel sheath guide for transbrachial carotid artery stenting: technical note
   T Iwata, T Mori, Y Miyazaki, M Nakazaki, Y Takahashi, K Mizokami

i81  Outcome of forced-suction thrombectomy in acute intracranial internal carotid occlusion
   Y-H Hwang, D-H Kang, Y-W Kim, Y-S Kim, S-P Park, C-K Suh

i85  A thromboembolic model for the efficacy and safety evaluation of combined mechanical and pharmacologic revascularization strategies
   M J Gounis, R G Nogueira, M Mehra, J Chueh, A K Wakhloo
