813 Editor’s column
Neurointervention: a call to science
M J Gounis

815 Commentary
Direct to embolectomy without IV tPA: the stage is set for a randomized controlled trial
R V Chandra, T M Leslie-Mazue, B P Mehta, J A Hirsch

817 Ischemic stroke
Acute Recanalization of Thrombo-Embollic Ischemic Stroke with prEset (ARTESp): the impact of occlusion time on clinical outcome of directly admitted and transferred patients
S Prothmann, B J Schweiger, A S Gersing, W Reith, T Niederstedt, A Felber, W Kurre

823 Impact of ASPECT scores and infarct distribution on outcomes among patients undergoing thrombectomy for acute ischemic stroke with the ADAPT technique

830 Thrombectomy in acute ischemic stroke: estimations of increasing demands
A Kurtze Söderqvist, T Anderson, N Ahmed, N Wahlgren, M Kaiser

834 Predictors of false-positive stroke thrombectomy transfers
J Yi, D Zielinski, B Ouyang, J Conners, R Dafer, J M Gounis

837 The association between carotid intraplaque hemorrhage and outcomes of carotid stenting: a systematic review and meta-analysis
W Bronkip, V T Lehman, J Huston, I H Muara, G Luczno, H J Clift, D F Kallmes

843 Interaction between the stent strut and thrombus characterized by contrast-enhanced high-resolution cone beam CT during deployment of the Solitaire stent retriever
T Tsumoto, Y Tsurusaki, S Tokunaga

849 New devices
Canadian Registry of LVIS Jr for Treatment of Intracranial Aneurysms (CarLA)

854 Endovascular treatment of complex intracranial aneurysms using Acandis Acclino stents
F Brassel, D Greiling, B Meira, M Schlunz-Hendann, B Greiling, K Melber

860 Head and neck
Endovascular treatment of head and neck arteriovenous malformations: long-term angiographic and quality of life results
D Meira, D Greiling, B Greiling, K Meller, C Jacobs, M Hechtner, T Schmitz, M Schlunz-Hendann, H Landemer, F Brassel

867 Clinical neurology
Dural sinus stenting for idiopathic intracranial hypertension: factors associated with hemodynamic failure and management with extended stenting
D A Kampe, J Seinfeld, X Huang, Q Mei, D E Case, C D Rask, P S Subramaniam, K E Lind, V S Pelak, J L Bennett

880 Basic science
Fistulosity-type vein of Galen malformation phantom model for endovascular training and research
D Meira, K Meller, D Greiling, C Jacobs, H Landemer, F Brassel

887 Neuroimaging
Time-resolved 3D rotational angiography: display of detailed neurovascular anatomy in patients with intracranial vascular malformations
S Lescher, S Gehrisk, S Klein, J Berkefeld

897 New developments

MORE CONTENTS ➤
Pediatric neurointervention: collimation on radiation exposure-associated lifetime excess tumor risk
K Chen, S Paramasivam, A Berenstein

Sacroplasty procedural extravasation with high viscosity bone cement: comparing the intraoperative long-axis versus short-axis techniques in osteoporotic cadavers
J W Miller, A Diani, S Docsa, K Ashton, M Sciamanna

Armband activity monitor data do not correlate with reported pain scores in patients receiving vertebroplasty
J G Peacock, R L Vine, J S McDonald, P J Novotny, D F Kallmes

Integrated live biplane fluoroscopic and cone-beam CT-guided external ventricular drain placement in the neurointerventional suite
A H Y Chiu, T R Marenza, J Spears

Renal cell carcinoma metastasis involving vertebral hemangioma: dual percutaneous treatment by navigational bipolar radiofrequency ablation and high viscosity cement vertebroplasty
J-B Zerlauth, R Meuli, V Dunet

A case of right middle cerebral artery ‘tendonectomy’ following mitral valve replacement surgery
M C Thomas, J E Delgado Almandoz, A J Todd, M L Young, J L Fease, J M Scholz, A M Milner, M Mulder, Y Kayan

Rete mirabile associated with pial arteriovenous fistula: imaging features with literature review
P K Mondel, R Saraf, U S Limaye
