Volume 13 Issue 3 | JNIS March 2021

Editor’s column
197 The neurointerventional paradox: ensuring patient safety without restricting technological innovation
R De Leacy

Commentary
200 The importance of wall degeneration in preclinical aneurysm models
B E Grütter, S Marbach

The pandemic and neurointervention
202 Ischemic stroke in COVID-19-positive patients: an overview of SARS-CoV-2 and thrombotic mechanisms for the neurointerventionalist
A Zakeri, A P Jadhav, B A Sullenger, S N Minjoe

Ischemic Stroke
207 Local anesthesia versus general anesthesia during endovascular therapy for acute stroke: a propensity score analysis

212 Systematic review and meta-analysis of current rates of first pass effect by thrombectomy technique and associations with clinical outcomes
M Abassi, Y Liu, S Fitzgerald, O M Mercuela, J L Arnto Larco, A Revi, R Kadrivel, I Savastano, W Bringik, D F Kallmes

217 Feasibility and safety of thrombectomy for isolated occlusions of the posterior cerebral artery: a multicenter experience and systematic literature review
L Meyer, P Papanagiotou, M Politi, A Kastrup, C Kretzer, U Hannig, H Kuenig, G Broecks, S M Pilgram-Pastor, M Wallocha, R Chapot, J Feulner, C P Stacke, H Lienchner

Hemorrhagic Stroke
226 Blebs in intracranial aneurysms: prevalence and general characteristics

231 Hemodynamic conditions that favor bleb formation in cerebral aneurysms
S F Salimi Ashkezari, F Mut, B J Chung, A M Robertson, J R Cebal

237 Morbidity and mortality associated with sequential flow reduction embolization technique of cerebral arteriovenous malformations using n-butyl cyanoacrylate
A P See, M H Mohammaden, M Uskelo, C J Stasiolten, S Amin-Hanjani, F T Charbel, V Aletich, A Alatii

241 Endovascular treatment as the main approach for Spetzler–Martin grade III brain arteriovenous malformations
H Kelvadat, R Blanc, R Fahed, A Povyson, A Movela, S Escalat, F Delvoye, J P Desilles, H Redjem, G Ciazio, S Smajda, M Hamaldini, M Mazzigki, M Pirot

247 Nuisance bleeding complications in patients with cerebral aneurysm treated with Pipeline embolization device
E Pressman, C A De la Garza, F Chiu, J Fishbein, M Wagon, A Siddiqui, K Snyder, J M Davies, E Levy, P Kan, Z Ren, M Mohin
New Devices and Techniques

251 Current and future usefulness and potential of virtual simulation in improving outcomes and reducing complications in endovascular treatment of unruptured intracranial aneurysms
JM Ospel, N Kashani, A Mayank, T Liebig, JK Kaesmacher, M Holmannspötter, J Shokeir, MA Almekhlafi, AP Misra, JH Wong, MGoyal

255 Embolus Retriever with Interlinked Cages (ERIC) versus conventional stent retrievers for thrombectomy: a propensity score-based analysis
CDucroux, NRenaud, RBourcier, GMarnat, ISidon, BCorb, SRichard, CDargazzandi, CArugunz, FEugene, SVannier, JLabreiske, GWalker, RBBlanc, MAConsoli, BLapergue, RFahed, for the ETIS investigators

261 First clinical multicenter experience with the new Scepter Mini microballoon catheter
DF Vollherbst, RChapot, MWallocha, ISAasa, CChvílek, ASaouer, EShatat, MNPsychogios, ABrehm, MBendszus, MAMöhlenbruch

Basic science

267 In situ decellularization of a large animal saccular aneurysm model: sustained inflammation and active aneurysm wall remodeling
RMKing, JCavoott, ETHlangan, ALippot, ARodriguez-Rodriguez, CMRaskes, SGupta, ASPor, PCaron, MJGowins, AABogdanov, Jr

272 Biomodex patient-specific brain aneurysm models: the value of simulation for first in-human experiences using new devices and robotics
VN Yamaki, NMCancelliere, PNicholson, MRodrigues, IRadovanovic, JMStongar, TKrings, VM Pereira

Head and Neck

278 Endovascular management of torcular dural sinus malformations in children: the role of straight sinus occlusion
SMajda, MŚderman, G Dorfmueller, NDorison, MCNgha, GRedesch

Socioeconomics

283 Strategies for writing a successful National Institutes of Health grant proposal for the early-career neurointerventionalist
PKan, MMokin, WJMack, RMStarke, KNSheth, FCAlbuquerque, MRLevitt

287 National Institutes of Health grant opportunities for the neurointerventionalist: preparation and choosing the right mechanism
PKan, MRLevitt, WJMack, RMStarke, KNSheth, FCAlbuquerque, MAmokin

Neuroimaging

290 Deep venous communication in vein of Galen malformations: incidence, imaging, and implications for treatment
HKortman, ENavaei, CARaybaud, KD Bhatia, MSheff, KT Brugg, D Armstrong, VM Pereira, PBDirks, TKrings, PMuthusami

Technical video

294 Snare salvage technique for deformed WEB device after deployment
ZAjuboori, D Ding, RFJames

Electronic pages

e2 The continuous quest for a more tailored approach to anesthetic management of patients undergoing endovascular therapy for acute stroke
MCamuto, DSimonato, NSYrmos, SOTomassi, PAWinkler, LPrisco

e3 Response to Ganau et al letter ‘The continuous quest for a more tailored approach to anesthetic management of patients undergoing endovascular therapy for acute stroke’
RPop, SChebbaro, RBeaumier, BCory
