

## Supplement

### **Radial First or Patient First: A Case Series and Meta-analysis of Transradial versus Transfemoral Access for Acute Ischemic Stroke Intervention**

**Supplementary Table 1.** Quality of the studies included in the review

**Supplementary Figure 1.** Preferred Reporting Items for Systematic Reviews and Meta-Analyses (PRISMA) flow diagram showing the number of articles identified and excluded at each stage of the literature search.

**Supplementary Table 1. Quality of the studies included in the review**

Study	Study Objective	Study Design			Study population		
		Were the hypothesis, aim, and objective of the study clearly stated?	Was the study conducted prospectively?	Were the cases collected at >1 center?	Were patients selected consecutively?	Were the characteristics of the patients included in the study described?	Were the inclusion and exclusion criteria for entry into the study clearly stated?
