Contents

Volume 15 Issue 9 | J NeuroIntervent Surg September 2023

Editor’s column
833 Rethinking the role of CT perfusion in the management of emergent large vessel ischemic stroke
J D B Diestro

Commentary
835 Decoding the data: a comment on the American Heart Association/American Stroke Association (AHA/ASA) 2023 Guideline for the Management of patients with Aneurysm Subarachnoid Hemorrhage
J F Fraser, J H Hei, J R Mascielli, J P Tsai

New devices and techniques
838 Endovascular flow disruption with the Contour Neurovascular System: angiographic and clinical results in a single-center study of 60 unruptured intracranial aneurysms
A Biondi, P Primikiris, G Vazile, G Charbonnier

839 Intracranial flow disruption for ruptured aneurysms: an international multicenter study

844 Ischemic stroke
846 Onset-to-treatment time and aneurysm regression predict improvement of cranial neuropathy after flow diversion treatment in patients with symptomatic internal carotid artery aneurysms
R Akiyama, A Ishi, T Kikuchi, M Okewa, Y Yamasu, A Abeha, J Oso, N Sasaki, H Tsuj, H Imamura, T Hataoe, N Sakai, S Miyamoto

851 Modern endovascular management of chronic total carotid artery occlusion: technical results and procedural challenges
R A Radu, F Casapro, I Deraz, C Dargazandii, F Raspi, P-H Lejevre, G Gascou, V Costalat

858 Retained radial catheters associated with variant radial anatomy in neurointerventional procedures

Ischemic stroke
864 COMancei MechANical Dilation for vasospasm (COMMAND): multicenter experience

871 Derivo embolization device for intracranial aneurysms: a Spanish multicenter retrospective study
C Pizana, S Remolli, J Zamaro, M Werner, M Espinosa de Rueda, P Vega, D Hernandez, E Murias, E Rivera, J Olier, L San Roman, A Pavez-Carpio, M Requena, S Aixa, M de Dos Lascuayes, M Moreu, S Rosati, L S Gramegna, C Castano, A Tomasselli

876 Algeria Stroke Program Early CT Score and collateral status predict target mismatch in large vessel occlusion with delayed time windows
Y Hang, C C Dong, H Ni, Y Cao, L B Zhao, S Liu, H-B Shi, Z Jia

881 Clinical evidence comparing bridging and direct endovascular thrombectomy: progress and controversies
X Bai, Z Fu, X Wang, C Song, X Xu, L Li, Y Feng, A A Dmytriw, R W Regenhardt, Z Sun, B Yang, L Jiao

886 Hemorrhagic stroke
886 Onset-to-treatment time and aneurysm regression predict improvement of cranial neuropathy after flow diversion treatment in patients with symptomatic internal carotid artery aneurysms
R Akiyama, A Ishi, T Kikuchi, M Okewa, Y Yamasu, A Abeha, J Oso, N Sasaki, H Tsuj, H Imamura, T Hataoe, N Sakai, S Miyamoto

More CONTENTS ➤
Flow diversion for compressive unruptured internal carotid artery aneurysms with neuro-ophthalmological symptoms: a systematic review and meta-analysis
D P O Kaiser, A Cuberi, J Linn, M Gawlitza

Long-term outcomes of flow diversion for unruptured intracranial aneurysms: a systematic review and meta-analysis
M A Shehata, M K Ibrahim, S Ghozy, C Bilgin, M S Jahal, R Kadrovet, D F Kalnnes

Natural history, angiographic presentation and outcomes of anterior cranial fossa dural arteriovenous fistulas

Procedural, workforce, and reimbursement trends in neuroendovascular procedures

Low left atrial volume is an independent predictor of persistent hypotension after carotid artery stenting
K Maekawa, N Ohara, J Takasugi, S Fujisawa, T Okada, C Miyakoshi, H Imamura, M Kawamoto, N Sakai

High-frequency optical coherence tomography predictors of aneurysm occlusion following flow diverter treatment in a preclinical model
R M King, A Peker, V Anagnostakou, C M Rasquet, J M Arends, H G Dixit, G J Ughi, A S Puri, M J Gounis, M S Shazeeb

Evaluation of an in vivo preclinical model for human middle meningeal artery embolization using the posterior intercostal artery of the swine
J L Arturo Larco, S I Madhani, Y Liu, M Abbasi, P N Lylyk, A Benike, A Shahid, B Tekin, R Quinton, L E Savastano

Dual-agent percutaneous sclerotherapy technique for macrocystic lymphatic malformations
M T Catton, A Baker, E R Smith, E Perez, K Hemphill, D L Cooke, C F Dowd

Correspondence on "Natural history, angiographic presentation and outcome of anterior cranial fossa dural arteriovenous fistulas" by Sanchez et al
X Su, Z Gao, Y Ma, Z Song, H Zhang, P Zheng, M Ye

Response to: Correspondence on 'Natural history, angiographic presentation and outcomes of anterior cranial fossa dural arteriovenous fistulas' by Su X, et al
S Sanchez, E A Samaniego

Minimally invasive hemispherotomy for refractory epilepsy in infants and young adults
R Doddamani, R Kota, N Ahemad, P S Chandra, M Trivedi
